

Mills Community House

PROJECT PROFILE

Mills Community House Benzonia, MI	
Architect:	aaI Architects Robert Sommerville, AIA
Project Type:	Stairwell Addition & Sitework Improvements
Materials:	Masonry Steel
Addition size:	457 SF 2 Story
Contact:	Duane Nugent Director
Complete project cost:	\$560,000
Completion date:	July 2014

Apex Engineering & Management, Inc. was retained by Mills Community House to provide construction management services for the planning, design, bidding, permitting, and construction phases for this project.

To satisfy building code and to provide the much needed additional access to the upper floor levels, a stair tower was added to their existing facility. The new stairwell tower needed to be tied into the existing building by a shared wall and existing doorways. Major site work, parking lots and landscaping was completed.

The project started in November 2013 with the concrete footings & wrapped up in July 2014 with final landscaping & permit close-out.
